

2016 DDA Meeting - Program

All talks, Business meeting, coffee breaks, and poster sessions will take place at
Vanderbilt University, 2201 West End Ave., Nashville, TN 37235
in Wilson Hall

Rules for speakers:

35 minute invited talks (30 minutes + 5 minutes for questions)
15 minute contributed talks (12 minutes + 3 minutes for questions)

Sunday, May 22nd

17:00 Committee meeting - Wilson Hall

19:00 Opening reception - Wilson Hall

Monday, May 23rd

9:00-9:10 Welcome Address: Kelly Holley-Bockelmann (DDA Chair)

Planet Formation and Migration (Chair: Renu Malhotra)

9:10 Konstantin Batygin "Origins of Hot Jupiters, Revisited"

9:25 Aaron Boley "The in situ formation of giant planets at short orbital periods"

9:40 Sean Mills "Kepler-233: A resonant chain of four transiting, sub-Neptune planets"

9:55 Craig Agnor "On the nature and timing of giant planet migration in the solar system"

10:10 Juliette Becker "WASP-47: a hot Jupiter with close friends"

10:25 Christopher Spalding "Dynamical origins of the Kepler dichotomy"

10:40-11:10 Coffee Break

Tidal Dynamics and Moon Formation (Chair: Alice Quillen)

BROUWER LECTURE:

11:10 Sylvio Ferraz Mello "Anelastic tides of close-in satellites and exoplanets"

11:45 Billy Quarles "Obliquity variations of a rapidly rotating Venus"

12:00 Benoit Noyelles "On the rotation of viscoelastic satellites"

12:15 Matija Cuk "Did the Kozai resonance help form Pluto's small moons"

12:30-14:00 Lunch

Stability of Many-body systems/non-conservative system (Chair: Fred Adams)

14:00 Daniel Scheeres "Hill stability in the finite density N-body problem"

14:20 Daniel Tamayo "A library for adding additional effects to N-body simulations"

14:40 David Tsang "Symplectic integrators: variational integrators for nonconservative systems"

15:00 Xianyu Wang "High eccentricity MMRs in the circular planar restricted three-body problem"

Poster Introductions (4x2 minutes)

15:15 Alice Quillen Simulating Tidal evolution and encounters with mass-spring models

15:17 Karl Jaehnig The Structural Evolution of Forming and Early Stage Star Clusters

15:19 Christina Davis Galaxy Transformation from Flyby Encounters

15:21 Indranil Banik Galaxy cluster collision speeds as a test of LCDM: possible systematics & how to avoid them

15:25-15:45 Coffee Break (Poster viewing)

Effects of unseen planets (Chair: Daniel Scheeres)

15:45 Christa Van Laerhoven "Effect of Unseen Planets on Secular Interactions"

16:05 Fred Adams "Interaction Cross Sections and Survival Probabilities for Proposed Solar System Member Planet Nine"

16:45 Kathryn Volk "Dynamics of the Most Distant Kuiper Belt Objects"

17:15 DDA Business Meeting

Tuesday, May 24th

Special-Session: Impact of Astrometry on Dynamics (Chair: Alice Monet)

| | | |
|-------------|-------------------|--|
| 9:00 | Gurtina Besla | "HSTPROMO and the dynamics of the Local Group" [INVITED] |
| 9:35 | Maria Tiongo | "Effects of dynamical evolution on the internal kinematical properties of star clusters" [DUNCOMBE] |
| 9:50 | Sebastien Lepine | "Local stellar kinematics from large astrometric surveys: mapping the Galactic phase-space substructure" [INVITED] |
| 10:25 | Keivan Stassun | "Determination of Precise Pre-main-sequence stellar properties through stellar and disk orbital dynamics" |
| 10:40-11:10 | Coffee Break | |
| 11:10 | Seigfried Eggli | "Is astrometry enough? Deflection relevant Near Earth Object characterization efforts in Europe" [INVITED] |
| 11:45 | Maria Kudryashova | "Solar system object observations with Gaia Mission" |
| 12:00 | Davide Farnocchia | "Scout: short-arc orbit analysis and hazard assessment for newly discovered asteroids" |
| 12:15 | Victor Slabinski | |
| 12:30 | P.K. Seidelmann | "Why the Greenwich Meridian Moved" |
| 12:45-14:00 | Lunch | |

Multiplanet Systems: Stability and Characterization (Chair: Craig Agnor)

| | | |
|-------|-------------------------|--|
| 14:00 | Jack Lissauer | "Orbital eccentricity and the stability of planets in the Alpha Centauri system" |
| 14:15 | Sarah Morrison | "Orbital stability of High Mass Planetary systems" |
| 14:30 | Alysa Obertas | "The stability of tightly-packed and evenly-spaced planetary systems" |
| 14:45 | Daniel Jontof-Hutter | "Eccentricity inferences in multi-planet systems with transit timing; degeneracies and apsidal alignment" |
| 15:00 | Kyle Conroy | "Discovery of a triple star system through dynamical Eclipse timing variations with Kepler eclipsing binaries" |
| 15:15 | Abhijit Krishna Puranam | "Tidal Q of a Super Earth: Dynamical constraints from the GJ 876 System" |

Poster Introductions (4x2 minutes)

| | | |
|-------------|---|---|
| 15:30 | Robert Jacobson | The Gravity Field of Saturn and the Mass of the Saturnian Rings at the end of the Cassini Mission |
| 15:32 | Oleksiy Golubov | Modelling evolution of asteroid's rotation due to the YORP effect |
| 15:34 | B. Carter & M. Hedman | A dusty ringlet with connections to both Prometheus and the F ring |
| 15:36 | Charlie Finch | URAT Parallax Catalog: the largest parallax catalog since Hipparcos |
| 15:40-16:10 | Coffee Break (Poster viewing) | |
| 16:10 | Renu Malhotra | "The mass distribution function of planets in the Galaxy" |
| 16:25 | Eva Bodman | "Cometary source for the strange behavior of KIC 8462852" [DUNCOMBE] |
| 16:40 | Karen Collins | "A case study in dynamical planet ingestion by a hot host star" |
| 19:00-22:00 | Public event at Dyer Observatory (optional): Panel discussion on Exoplanets | |

Wednesday, May 25th
Special session: Dynamics of Disks and Rings (Chair: Matthew Tiscareno)

| | | |
|-------------|------------------|--|
| 9:00 | Henrik Latter | "Planetary rings and astrophysical disks" [INVITED] |
| 9:35 | Douglas Hamilton | "Keeping the Edges Sharp I: Honing the Theory of Narrow Rings" |
| 9:50 | Andre Izidoro | "Structure of the Asteroid Belt from the Gas Giants' Growth and Chaotic Dynamics" |
| 10:05 | Seth Jacobson | "Establishing different size distributions in the asteroid belt" |
| 10:20 | Dong Lai | "Formation and dynamics of circumbinary planets" |
| 10:35-11:00 | Coffee Break | |
| 11:00 | Alice Quillen | "Warps and streams - Pushing and lifting material out of the midplane from galactic and circumstellar disks" [INVITED] |
| 11:35 | Sarah Loebman | "Chemodynamical signatures of radial migration in the Milky Way" [INVITED] |
| 12:10 | Jon Bird | "Galaxy disks in balance: vertical settling as a result of inside-out growth" |
| 12:25 | Curtis Stuck | "Near-exponential galaxy disks produced by scattering" |

processes"

12:40- 14:00 Lunch

Dynamics of galaxies and around supermassive black holes (Chair: Sarah Loebman)

- | | | |
|-------|-------------------------|--|
| 14:00 | Stacy McGaugh | "Predicting the Velocity Dispersions of the Dwarf Satellites Galaxies of Andromeda" |
| 14:15 | Indranil Banik | "Anomalous motions in the local group: Evidence of a past Milky-Way Andromeda Flyby" [DUNCOMBE] |
| 14:30 | Kelly Holley-Bockelmann | "Bar formation from Galaxy Flybys" |
| 14:45 | Monica Valluri | "Orbits in N-body bars and the origin of the X-shapes in boxy-peanut bulges" |
| 15:00 | Ann-Marie Madigan | "Gas clouds as dynamical probes of the accretion flow around Sgr A*" |
| 15:15 | Mauri Voltonen | "Orbit of the OJ287 black hole binary as determined from the General Relativity centenary flare" |

15:30-16:00 Coffee Break (Poster viewing)

Dynamics of Small Solar System Bodies (Chair: Christa Van Laerhoven)

- | | | |
|-------|--------------------|--|
| 16:00 | Henry (Luke) Dones | "Could the crates on the mid-sized moons of Saturn been made by satellite debris?" |
| 16:15 | Mark Showalter | "Orbital and rotational dynamics of Pluto's small moons" |
| 16:30 | Rachel Smullen | "The fate of debris in the Pluto-Charon system" |
| 16:45 | Daohai Li | "Himalia and Phoebe: Little moons that punch above their weight" |
| 17:00 | Paul Chodas | "Designing Asteroid Impact Scenario Trajectories" |
| 17:15 | Oleksiy Golubov | "Spin state equilibria of asteroids due to YORP effects" |
| 17:30 | Rodney Anderson | "Low-energy asteroid and comet transit analysis using isolating blocks" |

19:00 Conference Banquet: [1] target="_blank">Sambuca, 601 12th Ave South, 7 pm, Wed. \$65

--> Sign-up for banquet by COB Monday. See Kelly H-B for details.

Thursday, May 26th

Saturn and Saturn's rings (Chair: Douglas Hamilton)

- | | | |
|-------------|---------------------|---|
| 9:00 | Matthew Tiscareno | "Propeller peregrinations: Ongoing observations of disk-embedded migration in Saturn's rings" |
| 9:15 | Thomas Rimlinger | "Keeping the Edges Sharp II: Honing Simulations of Narrow Rings" |
| 9:30 | Philip Nicholson | "Kronoseismology III: An update on Saturn-driven waves in the C ring" |
| 9:45 | Matthew Hedman | "An array of asymmetry in Saturn's structure revealed by its rings" |
| 10:00 | Maryame El Moutamid | "Tesseral resonances in the rings of Saturn" |
| 10:15 | Ethan Arnault | "Physical characteristics of 'wisps' in the outer edge of the Keeler gap in Saturn's rings" |
| 10:30-11:00 | Coffee Break | |
| 11:00 | Robert Jacobson | "The gravity field of Saturn and the mass of the Saturnian rings at the end of the Cassini Mission" |
| 11:15 | Joseph Spitale | "4-km body(ies?) embedded in Saturn's Huygens Ringlet" |
| 11:30 | Robert Chancia | "Persistent pattern speeds in Saturn's D ring" |

Public Event on Exoplanets at Dyer Observatory:

[Public nights at Dyer Observatory](#) [2] are typically sold out a month in advance and draw about 100 visitors, limited only by the available parking on the mountain. We will provide transportation to and from Dyer for a special DDA-sponsored public event on exoplanetary dynamics and astrobiology on May 24th at 7 pm.

We plan a short introductory primer on exoplanets, followed by a 4-6 member panel debate and Q+A session on what new data reveal about the possibility of life on other worlds.

If you would like to participate in this public event as a speaker, panelist, or guest, please email Kelly Holley-Bockelmann (k.holley@vanderbilt.edu [3]) with the subject line 'DDA at Dyer'.
