DDA BYLAWS CHANGES

The DDA Committee approved a proposed set of changes to the DDA Bylaws at its 1994 meeting. These changes and a ballot were distributed with the last Newsletter. A total of 43 Bylaws changes ballots were returned to the secretary. There were 40 votes in favor of the changes and 3 votes against. The revised Bylaws are now official.

DDA TO MEET IN YOSEMITE NATIONAL PARK, CA ON 24-26 APRIL 1995

The DDA regular meeting for 1995 will be held in the Yosemite Lodge in the park, on Monday through Wednesday, April 24-26, 1995. The Committee meeting will be held on Sunday, the 23rd. Roy Laubscher is the local host. He, Phil Ianna, and Art Whipple will act as the organizing committee. Abstracts of invited and contributed talks will be published in the Bulletin of the American Astronomical Society. The abstract deadline is 20 March 1995.

Chris Hunter will give his Brouwer Award lecture entitled "Bending Waves in Flattened Stellar Systems." Ray Duncombe will be the banquet speaker and will commemorate the 25th anniversary of the DDA with a history of the Division. Bob Hanson will give an invited lecture entitled "The Lick Northern Proper Motion (NPM) Catalogs: A Database for Galactic Studies" and Jeff Cuzzi will give an invited lecture entitled "Planetary Rings Update."

Yosemite is, of course, one of the jewels of the national park system. There are tremendous opportunities for hiking, camping, rock climbing, bus and tram tours, bicycling, ranger walks, and horse back riding. Details about the park and activities can be obtained by asking for the vacation planning materials from Yosemite reservations at (209) 252-4848. This will be a perfect meeting to bring your family. In late April the weather can be wet and/or cold so one should prepare accordingly.

We had good response to the request in the last Newsletter for an indication from people as to whether or not they intended to come to this meeting. 25 people have said that they intend to come and another 4 have said that they may attend. A list of these people, along with any available information on the talk(s) they may give, appears at the end of this Newsletter.

Lodging Arrangements

Roy has made a block reservation for 60 rooms at the Lodge and 5 rooms at the Ahwahnee Hotel for the nights of April 23-26. The room block hold does not expire until 30 days prior to the meeting. Reservations for the blocked rooms are to be made by returning the registration form that was included with the last Newsletter to Yosemite Concessions Services Corp. by March 23. If you need another copy of the form please contact Art Whipple. Availability of rooms in the park outside the meeting dates is very limited. Try contacting Yosemite reservations at (209) 252-4848. You may also check with Roy for a list of nearby hotels outside the park. If you make reservations through Yosemite reservations, outside the block reservations, please send your plans to Roy so that he can make sure that the DDA gets credit for your reservation.

Please return the attached meeting registration form to Roy by March 20. The meeting registration fee is \$25. The banquet fee is \$30. Meals can be purchased in the Lodge for the customary restaurant prices. Picnicking supplies are readily available in the valley and can save the expense of some restaurant meals.

Members can fly into either San Francisco or, better yet, into Fresno. Yosemite is a four hour drive from San Francisco and a one and a half hour drive from Fresno. Once arrived at the Lodge in Yosemite Valley, a car is not necessary since there is excellent shuttle service around the valley; therefore participants can save money by car pooling.

THE ABSTRACT DEADLINE FOR THIS MEETING IS 20 MARCH 1995

You have three options for submitting your abstract:

Electronic Submission

You can submit your abstract electronically just as for a AAS meeting anytime before March 20. An electronic abstract template is available through an anonymous FTP logon at the AAS Executive Office. To retrieve the abstract materials, use the following procedure:

(Assuming your prompt is \$)

```
$ ftp blackhole.aas.org
Username: anonymous
Password:
ftp> cd meetings/abstracts
ftp> mget *
ftp> bye
$
```

If your computer does not know about blackhole.aas.org, try typing the number [192.102.234.112] on the FTP command line. Complete instructions for using an anonymous FTP logon are also included in the Electronic Mail Guide in the 1994 Membership Directory. If you have any questions about electronic submission while you are preparing your abstract, please contact the Executive Office for assistance. You can call the office at 202-328-2010, or send an e-mail message to abs-help@aas.org [1].

Mark Abstract "DDA"

When you fill out the abstract template, be sure to indicate that your abstract is for the DDA meeting, NOT the AAS 186th meeting in Pittsburgh. To do this, type DDA in the /societysig line. It should look like the following:

`/societysig{DDA}``%OPTIONAL`

You can also type any special instructions in the `/instructions` line on the template.

Electronic Acknowledgment of Abstract Receipt

When you submit your abstract electronically, you should receive two e-mail confirmations of its receipt. After your e-mail message has been received at the Executive Office and has been identified as an abstract, you should get a message from the AAS computer advising you that the abstract has been received; this should happen promptly, typically within minutes of the message's arrival. The abstract message will be held for further processing.

Incoming abstracts are usually processed within 24 hours. The abstracts are accepted and assigned running identification numbers during this stage, and you should receive a second message confirming the acceptance of your abstract and notifying you of the running number. If you do not receive a confirmation, **DO NOT RESUBMIT THE ABSTRACT**. Please contact the Executive Office by calling 202-328-2010 or by sending e-mail to abs-help@aaas.org [1]. If you submit the abstract more than once, you are likely to be charged more than once as well. Contacting the Executive Office will help avoid this inconvenience.

Submitting Electronic Abstracts for More than One Author

If you are submitting abstracts for a group of people in your institution, please **DO NOT** submit them in the same e-mail message. We do require separate e-mail messages for all abstracts. If you include more than one abstract in an e-mail message, the additional abstracts are likely to remain unprocessed.

Get the Abstract Form Electronically

You can get a postscript file of the abstract form and instructions directly from the AAS FTP server. The following instructions will allow you to access it.

(Assuming your prompt is \$)

```
$ ftp blackhole.aas.org
username: anonymous
password: your e-mail address
ftp> cd /divisions
ftp> get ddaform.ps
ftp> quit
$
```

Print the form on your own laserwriter and fill it out just as you would for the old printed forms.

Get the Abstract Form by Regular Mail

As a last resort, a printed form may be obtained from the DDA Secretary. This costs the Division money so please use one of the other two methods if possible.

Printed abstract forms should be sent to: Dr. Art Whipple, McDonald Observatory, University of Texas, Austin, TX 78712-1083

NOMINATIONS FOR DDA OFFICERS

The nominating committee of Alice Monet (past Chair), Sethanne Howard, and Bill Kaula has presented the following slate of nominees for the coming year.

Chair:

Phil Ianna - University of Virginia

Vice Chair:

Chris Hunter - Florida State University

Barbara Schreur - Texas A&M University-Kingsville

Division Committee:

Harold F. Levison - Southwest Research Institute

Jay H. Lieske - Jet Propulsion Laboratory

Doug Mink - Harvard-Smithsonian Center for Astrophysics

Jane Morrison - University of Florida

Judit Ries - University of Texas at Austin

Carol Williams - University of South Florida

Additional nominations for specific offices or positions are acceptable if signed by at least 12 DDA members and if received by the Division Secretary at the above address no later than 9 March 1995. The ballot will be mailed out in late March.

Once elected, the new Committee members will replace George Benedict, Tom Corbin, and Joel Tohline whose terms of office will terminate after they attend the April 1995 Committee and Business meetings. The terms of office for John Chandler, Paul Chodas, and Roy Laubscher will continue through 1995.

MEETING ANNOUNCEMENT

A meeting on the 'Origins, Evolution, and Destinies of Binary Stars in Clusters' is to be held in Calgary, Alberta, June 18-23, 1995. Details can be found on the WWW pages:

<http://algol.iras.ualgary.ca/announce.html> [2] or further details, including registration & accommodation forms can be obtained from: E. F. Milone - milone@acs.ualgary.ca [3] or from: Dirk Terrell - terrell@algol.iras.ualgary.ca [4]. The WWW pages also contain the layout of the campus housing rooms & suites). Here is a short excerpt from the Justification pages of the WWW, giving the relevance to dynamical studies:

It has become clear over the past few years that the role played by binary stars in the dynamical evolution of star clusters is critical (see, for example the major summary by Hut 104, 981, 1992). Both open and globular star clusters have been the objects of recent studies of the relationship between binary stars and the 'blue stragglers' (stars that are too blue for their luminosities, if normal evolution of single stars had produced them). The merged products of binary star evolution may be possible paths to these and related anomalous objects. In any case, the dynamical evolution of systems influences their environments and vice versa; the results of these enquiries are important for understanding the existence and role of the objects as standard candles. Thus the meeting has ramifications beyond the subject areas.

DDA MEETING IN YOSEMITE 24-26 APRIL 1995

People who plan to attend:

Participant	Prese ntatio	Presentation Topic
-------------	-----------------	--------------------

	n	
	Type	
George F. Benedict	oral	Astrometric planet search with HST
Alan Boss	oral	Formation of multiple protostellar systems
Tom Corbin	oral	Observations of Solar System objects at the USNO
Jeff Cuzzi	invite	Planetary Rings Update
	d	
Ray Duncombe		
Alan Fiala		
Otto Franz	poster	TBA
S.J. Goldstein	oral	On the flux of millimetric space debris
Robert Hanson	invite	The Lick Northern Proper Motion (NPM)
	d	Catalogs: A Database for Galactic Studies
Chris Hunter	Brouw	Bending waves in flattened stellar systems
	er	
Phil Ianna		
William Jefferys	poster	Optical field angle distortion for HST
Bill Kaula	oral	TBA
Roy Laubscher		
Jer-Chyi Liou	oral	Radiation force and solar wind drag in the restricted three-body problem
	poster	A study of the orbital evolution of micron-sized asteroidal dust particles trapped in the 1:1 mean motion resonance with Jupiter
Dick Miller	oral	TBA
Doug Mink	oral	TBA
John Ries		
Judit Gyorgyey Ries	oral	TBA
Barbara Schreuer		
Peter Shelus		
Larry Taff	oral	The Discovery of A Magnitude Term in Schmidt plates
Peter Vandervoort	oral	TBA
Art Whipple	oral	TBA
People who may attend:		
Alice Monet		
Jane Morrison	oral	Re-reduction of the Southern Polar Zone of the Yale Photographic Catalog
J.D. Mulholland	oral	European tests of orbital debris detection
Martin Slade
